

A1
Curt.

an electrolyte film, and then

subjecting the resulting electrolyte film to absorb an ion
conductive liquid electrolyte.

Please add the following new Claims:

6. (New) A process for the preparation of the solid electrolyte
for rechargeable cells according to Claim 2, which comprises the
steps of:

dissolving a mixture of an absorbent and a polymer binder in a
solvent for the polymer binder,

making the resulting solution into a film and drying it to form
an electrolyte film, and then

subjecting the resulting electrolyte film to absorb an ion
conductive liquid electrolyte.

7. (New) A process for the preparation of the solid electrolyte
for rechargeable cells according to Claim 3, which comprises the
steps of:

dissolving a mixture of an absorbent and a polymer binder in a
solvent for the polymer binder,

making the resulting solution into a film and drying it to form
an electrolyte film, and then

subjecting the resulting electrolyte film to absorb an ion
conductive liquid electrolyte.

IN THE DRAWINGS

The drawings (Figs. 1-3) as filed in PCT International Application
No. PCT/KR99/00797 were attached to the subject PCT application due
to a clerical error; and therefore the drawings were amended during
